COMBO HEAT PRESS (BLACK)

5IN1

₹11,000
+GST

Parameters

Color : Black
Voltage : 110 V/220V
Input Power : 1250 W
Weight : 20Kg
Dimension : 30×38 cm

Bed Size : 12"×15"

Overview

A 5-in-1 heat press machine is a versatile piece of equipment used in various printing and heat transfer applications, typically in the context of customizing garments and other items. It's called "5-in-1" because it combines multiple functions into a single machine. These machines are commonly used by businesses, crafters, and individuals looking to create personalized and customized items, Such as Fabric, Metal, Wood, Ceramic, Crystal & Glass. Created your own custom T-Shirts, Mouse Pads and many more items.

Flat Heat Press: This attachment allows you to transfer designs, graphics, or images onto flat surfaces like T-shirts, mouse pads, puzzles, and more. It works by applying heat and pressure to a transfer paper or vinyl, adhering it to the surface.

Mug Press: The mug press attachment is used to transfer designs onto cylindrical objects like coffee mugs, travel mugs, and sports bottles. It's especially popular for customizing promotional items.

Plate Press: This attachment is designed for transferring designs onto plates. It's often used for creating personalized commemorative or decorative plates.

Cap Press: The cap press attachment is used to apply designs or logos onto baseball caps and hats. It's commonly used in the customization of sports team caps, promotional headwear, and more.

Overview

A 15x15 combo heat press machine typically refers to a heat press that has a platen (heating element) size of 15 inches by 15 inches. This size is suitable for a variety of heat transfer applications, including customizing garments, accessories, and other flat surfaces. The "combo" aspect often indicates that the machine comes with multiple attachments or functions, expanding its versatility. Here are common features associated with a 15x15 combo heat press machine:

Flat Heat Press (15x15): The primary function allows you to transfer designs onto flat surfaces like T-shirts, sweatshirts, tote bags, and more.

Mug Heat Press Attachment: This attachment allows you to customize cylindrical objects such as mugs. The size of the attachment corresponds to the diameter of typical mugs.

Plate Heat Press Attachment: This attachment is designed for transferring designs onto plates. Different sizes may be included to accommodate various plate sizes.

Cap Heat Press Attachment: The cap attachment is specialized for customizing the front panels of caps or hats.

Description

A touch screen control panel slider heat press machine combines the features of a slider heat press with a modern touch screen interface for controlling the heat press process. Here's a breakdown of its features and functionality:

Slider Design: Like traditional slider heat press machines, a touch screen control panel slider heat press features a sliding mechanism that allows the heating element (platen) to move in and out of the machine. This design facilitates easier loading and unloading of garments and precise positioning of transfer materials.

Touch Screen Interface: The machine is equipped with a touch-sensitive display panel, typically located on the front or side of the machine. This touch screen interface replaces traditional buttons or dials and allows users to control various parameters of the heat press process.

DOUBLE BED HEAT PRESS

Description

A double-bed / double-station setup means the press has two work surfaces: while one print is heating, you can prepare the next — reducing idle time and boosting productivity (common feature in dual station presses). This is especially useful if you're printing lots of T-shirts, hoodies, mouse-pads, etc., regularly.

Key Features to Look For

- Two working stations for continuous operation.
- Supports different materials like cotton, polyester, ceramic, metal, and wood.
- Digital controllers for precision settings.
- Fully Automatic: Auto open for high-speed production.
- T-shirt printing (sublimation, vinyl/HTV, DTF)

Input Power : 300 W
Weight : 4 Kg
Dimension : 38×36×33 cm

A mug heat press is a specialized machine used to transfer designs, logos, or images onto mugs using heat and pressure. It is commonly used for sublimation printing, vinyl transfers, or other heat transfer methods.

Key Features & Benefits

- Print your design on sublimation paper using sublimation ink.
- Clean the mug surface and position the design correctly using heat-resistant tape.
- Adjust time, temperature, and pressure settings based on mug and transfer type (e.g., 180–200 °C (356–392 °F) for 180–300 seconds for sublimation).
- Place the mug in the press, lock it in, and start the machine.
- Carefully remove the mug and let it cool before peeling off the paper.

DOUBLE MUG HEAT PRESS

Parameters
Color : Black
Voltage : 220V / 110 V
Input Power : 450 W
Weight : 5 Kg
Dimension : 38×36×33 cm

A double mug heat press is a heat press machine designed to print on two mugs simultaneously, making it ideal for increasing production efficiency. These machines are commonly used for sublimation printing, heat transfer vinyl (HTV), or laser transfer on ceramic, glass, or stainless steel mugs.

Key Features & Benefits

- Dual Heating Elements – Ensures even heat distribution on both mugs.
- Adjustable Temperature & Time Settings – Necessary for different materials and coatings.
- Interchangeable Mug Attachments – Supports multiple mug sizes (e.g., 11oz, 15oz, latte mugs).
- Sturdy Construction – Durable clamps and heating elements for long-term use.
- Digital Display – Allows precise control of time and temperature.

5IN1 MUG HEAT PRESS

₹27500

+GST

Parameters

Voltage : 220V / 110 V

Input Power : 900 W

Temp Range : Upto 400°F

Time : 0-999 Seconds

A 5-in-1 mug heat press is a machine designed to transfer graphic designs onto mugs — often up to five mugs at once. It's used primarily for sublimation printing, where heat and pressure transfer ink from special paper onto ceramic surfaces. These machines are popular for making custom mugs for gifts, businesses, events, advertising, etc.

Key Features & Benefits

- **Five Heating Units** – so you can press up to 5 mugs simultaneously, which is great for higher volume work.
- **Digital temperature/time controls** – each mug station often has individual settings on a panel, making it easier to set exact conditions for best print results.
- **Sublimation ready** – designed for mugs with special coatings that take sublimation ink.
- **Sturdy Construction** – Durable clamps and heating elements for long-term use.
- **Adjustable settings** – you typically set the heat (often up to ~450°F / 230°C) and press time depending on the mug and transfer paper being used.

Weight : 4.9Kg
Dimension : 35×29×23 cm

An Automation mug press for tumblers machine a home appliance design, and the shell is made of high-strength, high-temperature resistant plastic, which will not deform or melt. This mug heat press fits a wide array of mugs, tumblers, glassware, cups, water bottles, and straw cups. Paired with a large LCD screen design, intelligent temperature control, precise temperature control, to improve the transfer effect.

Key Features & Benefits

- Specially built to fit mugs, bottles, tumblers, and straw cups.
- Auto adjustable system to fit different bottle sizes.

SIPPER/BOTTLE HEAT PRESS

₹ 9000
+GST

Parameters

Color : Black
Voltage : 220V / 110 V
Input Power : 450 W
Weight : 5 Kg
Dimension : 38×36×33 cm

A Sipper Heat Press Machine is designed to print customized designs onto cylindrical bottles, such as sipper bottles, tumblers, and flasks, using sublimation, heat transfer vinyl (HTV), or laser transfer. It is widely used for personalized gifts, branding, and promotional products.

Key Features & Benefits

- Specially built to fit sipper bottles, tumblers, and flasks.
- Works with different materials like stainless steel, aluminum, and plastic (coated for sublimation).
- Temperature range: 220–350 °C (356–428 °F).
- Adjustable clamp system to fit different bottle sizes.
- Ensures vibrant, long-lasting prints without fading or peeling.

Description

A Semi-Automatic Label Heat Press Machine is designed for quick and efficient transfer of labels, tags, and logos onto garments, fabrics, and other materials. It is ideal for branding clothing, uniforms, and promotional products while reducing manual effort through automated pressing mechanisms.

Key Features & Benefits

- Small heat platen designed specifically for neck labels, tags, logos, and patches.
- Suitable for T-shirts, uniforms, caps, tote bags, and shoes.
- Ensures sharp, long-lasting prints without fading or peeling.
- Supports sublimation, heat transfer vinyl (HTV), DTF, and screen print transfers.
- Temperature range: 220–280 °C (248–428 °F).

MINI IRON HEAT PRESS

₹ 3500
+GST

Parameters

Voltage : 220V / 110 V

Input Power : 450 W

Dimension : 22×13×22 CM

Description

A Mini Iron Heat Press is a compact, handheld heat press designed for small-scale heat transfers, ideal for craft projects, labels, patches, and small designs. It is commonly used for HTV (Heat Transfer Vinyl), sublimation, DTF (Direct-to-Film), and rhinestone transfers on fabrics, wood, and other materials.

Key Features & Benefits

- Small and lightweight, making it perfect for travel or home use.
- Ideal for small projects, DIY crafts, and personalized gifts.
- Usually has low, medium, and high heat settings for different materials.
- Works with cotton, polyester, canvas, leather, and wood.
- Auto shut-off for safety.
- Comfortable grip and easy-to-use design.

CAP/HAT HEAT PRESS

₹ 7500
+GST

Parameters

Color : Black
Voltage : 220V / 110 V
Input Power : 450 W
Dimension : 140 ×80 mm

Description

An Auto-Open Hat/Cap Heat Press Machine is designed for efficient and hands-free operation, making it ideal for customizing hats, caps, and visors using heat transfer vinyl (HTV), sublimation, DTF (Direct-to-Film) print transfers. The auto-open feature prevents overheating and reduces operator fatigue, making it perfect for high-volume production.

Key Features & Benefits

- The press automatically opens when the timer runs out.
- Prevents overheating or scorching of materials.
- Specially designed to fit hat/cap contours, ensuring even heat application.
- Works for baseball caps, trucker hats, visors, beanies, and more.
- Temperature range: 120–220 °C (248–428 °F).
- Adjustable pressure for different hat materials and thicknesses.

AUTO OPEN CAP HEAT PRESS

₹ 10000

+GST

Parameters

PEN HEAT PRESS

₹ 9000
+GST

Parameters

Color : Black
Voltage : 220V / 110 V
Input Power : 450 W
Weight : 10 Kg

Description

A Pen Heat Press Machine is designed for customizing pens using sublimation, heat transfer vinyl (HTV), or laser transfer printing. It is widely used for corporate branding, promotional gifts, and personalized pen designs.

Key Features & Benefits

- Some models can press 5–10 pens at a time for higher productivity.
- Perfect for bulk production and businesses.
- Temperature Range: 180–220 °C (356–428 °F).
- Time Setting: 20–60 seconds per batch.
- Ensures sharp, vibrant, and long-lasting prints.
- Works with plastic, metal, and wooden pens (with a sublimation coating).

LANYARD SUBLIMATION MACHINE

100 METERS
16 MM : Rs. 350*/-
20 MM : Rs. 375*/-
Pack of 5 Pcs.

Description

A Lanyard Heat Press Machine is specifically designed for printing logos, designs, or text onto lanyards using sublimation, heat transfer vinyl (HTV), or screen print transfers. It is commonly used for corporate branding, ID badge lanyards, promotional giveaways, and event merchandise.

Key Features & Benefits

- Specially designed to fit lanyards, ribbons, and straps.
- Ensures even heat distribution for high-quality prints.
- Temperature Range: 150–220 °C (302–428 °F).
- Time Setting: 20–60 seconds depending on material and transfer type.
- Allow multiple lanyards to be pressed at once.
- Increases efficiency for bulk production.

ROUND BADGE MAKING MACHINE

₹10000
+GST

Parameters

Color : Red
Capacity :300 / hour
Input Power : No
Dimension : 44mm and 56 mm

44 MM Medium Badge

Customized Pin Badges: Pin them to your Shirt, T-Shirt or Bag, and add that extra color and intrigue. These 44 MM round badges can be customized by adding your photo, logo, image or text.

₹5

MOQ: 500

56 MM Medium Badge

Customized Pin Badges: Pin them to your Shirt, T-Shirt or Bag, and add that extra color and intrigue. These 55 MM round badges can be customized by adding your photo, logo, image or text.

₹6

MOQ: 500

Description : A button badge making machine is a device used to create button badges, also known as pinback buttons or button pins. These machines are commonly used for various purposes, including promotional events, political campaigns, fundraising, and personal customization.

Button Badge Press: The core component of the machine is a press that combines different elements to create a button badge. This press usually consists of a die set, upper platen, and lower platen.

Dies: Dies are interchangeable molds that determine the size and shape of the button badge. Different dies can be used to make badges of various sizes, such as standard 1-inch, 44 MM and 56 MM badges. The die set includes a top die and a bottom die.

Button Components: Button badges typically consist of several components, including a metal shell (front), a clear plastic cover (mylar), a paper or printed graphic, and a metal pinback. These components are assembled within the die set during the button-making process.

VINYL CUTTING PLOTTER

₹17999

+GST

Parameters

Stand : Yes
Interface : COM+USE
Power Supply : 90 V - 260 V
Cutting Width : 630 MM
Size : 96 ×35 ×43 CM
Cutting Speed : 800 MM/S
Driver : Flexi 10.5 Pro Software

Description

A vinyl cutting plotter is a machine used in the field of sign making, graphics, and digital design. It is designed to precisely cut vinyl sheets or rolls into various shapes, letters, and designs. Vinyl cutting plotters are commonly used for creating vinyl decals, signs, banners, vehicle graphics, heat transfer designs for textiles, and more.

SILHOUETTE CAMEO 5 MACHINE

₹ **27500**
+GST

Parameters

Width : Full 12 Inch
3 MM clearance for thicker materials
Print & Cut Registration Capability
Automatic Tool Detection
Wireless cutting with Bluetooth
Weight : 10 Kg

Description

The Silhouette Cameo is an electronic cutting machine designed for precise cutting of vinyl, paper, fabric, cardstock, and other materials. It is widely used in crafting, DIY projects, custom apparel, stickers, decals, and more.

Key Features & Benefits

- Cuts HTV (Heat Transfer Vinyl), adhesive vinyl, cardstock, fabric, and more.
- Can cut intricate designs and detailed patterns with high accuracy.
- Features an AutoBlade that adjusts settings based on the material selected.
- Reduces the need for manual blade adjustments.
- Works with printers to cut around printed designs (great for stickers, labels, and decals).
- Supports vinyl, heat transfer materials, paper, fabric, and even thin leather.
- Compatible with SVG, PNG, JPEG, and DXF files.
